

SAMUEL NGUGI GITAU

Junior Full-Stack Software Developer

Nairobi, Kenya | +254 758 750 963 | amsamgitau@gmail.com | github.com/ngugilovesyou | samuel-pi-three.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building and shipping responsive, secure web applications using React, Next.js, Django, and Flask. Comfortable owning projects end-to-end — from UI/UX design and REST API development through authentication, payment integration, and deployment. Freelance and internship experience gathering requirements directly from clients and delivering production-ready features independently and as part of a team. Seeking a Junior Full-Stack Software Developer role to keep building on a growing foundation in modern JavaScript/TypeScript and Python web development.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, HTML5, CSS3, SQL

Frontend: React, Next.js, Angular, Tailwind CSS, Responsive Web Design, UI/UX Design, SEO Best Practices

Backend: Django, Flask, Django REST Framework, REST API Design, JWT Authentication, bcrypt

Data & Tools: PostgreSQL, SQLite, Git, Postman, Vercel, M-Pesa & PayPal API Integration

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Freelance (Contract) 2024 – Present

Delivered end-to-end web applications — including Motoket, AYO Wellness, MindcareTest, and Royal Realty — independently managing requirements gathering, UI/UX design, development, and deployment for direct clients.

Built responsive, SEO-optimized front ends and REST APIs with React, Next.js, Django, and Flask, replacing weaker session-based authentication with JWT auth and bcrypt hashing to strengthen application security.

Integrated secure M-Pesa and PayPal payment processing end-to-end across multiple client sites, following web security best practices from checkout through confirmation.

Managed client communication and project scope independently, translating business requirements into shipped, production-ready features on a contract basis.

Web Developer Intern | WSpace AI Jun 2025 – Sep 2025

Built and tested React and Django features for production dashboards alongside senior engineers, improving reliability and day-to-day usability.

Identified and resolved bugs across the stack, contributing to more stable releases.

Participated in code reviews and payment integration work, applying team feedback to write more maintainable code.

AI Evaluation Contributor | AfterQuery / Harbor 2024 – Present

Evaluated software engineering tasks and technical responses against structured QA guidelines, sharpening code-quality judgment and attention to correctness, readability, and best practices.

SELECTED PROJECTS

Motoket — Django REST Framework, React | motoket.onrender.com/shop

Built an e-commerce style platform enabling users to browse listings and complete purchases through an integrated payment flow.

Designed REST API endpoints with Django REST Framework and connected them to a React front end, handling product, cart, and transaction data.

AYO Wellness — E-commerce, Payment Integration | ayo.co.ke

Built a live e-commerce platform for a wellness products brand, covering product catalog, shopping cart, and checkout.

Implemented a responsive storefront and integrated payment processing to support real customer transactions.

MindcareTest — Django, React | mindcaretest.health

Developed a full-stack application with secure user authentication, focusing on protecting user data and session handling.

Built the React front end and Django backend together, translating a health-focused product concept into a working application.

Royal Realty — Next.js, Tailwind CSS | royalrealty.co.ke

Built a property listings site with a responsive, SEO-optimized front end using Next.js and Tailwind CSS.

Structured pages and metadata for search visibility while keeping the UI clean and mobile-friendly.

TaskFlow — Angular, Flask | task-flow-pi-navy.vercel.app

Built a task management web app with an Angular front end and Flask backend, covering core CRUD functionality for tracking tasks.

EDUCATION

Software Engineering Certificate — Moringa School June 2024 – November 2024

Relevant coursework: Full-Stack Web Development, REST API Design, Databases, Authentication & Security, Software Engineering Fundamentals.
